## Education

---

2018 – 2023/04

**Diploma in Information Technology**

*Vaal University of Technology*

## Professional Experience

---

2024/01 – 2025/06

**Developer Intern**

Johannesburg, South Africa

*City of Johannesburg*

- Led development of multiple web applications using C#, ASP.NET [↗](#) Core MVC, and Entity Framework, automating critical municipal processes including property management and financial workflows.
- Designed and implemented a property management system integrating GIS mapping that enabled valuers to efficiently manage parent-child property relationships and visualize locations.
- Automated high-volume administrative processes including weekly data extract generation and property valuation notifications, reducing manual workload by eliminating paper-based workflows
- Built an audit-tracked meeting management system to handle role assignments and developed SQL-based solutions for the Group Finance department's data needs

## Certificates

---

**Foundational C# with Microsoft on freeCodeCamp - July 2024** [↗](#)

Acquired a strong foundational skill in the C# programming language, from learning about primitive data types to exception handling.

**Responsive Web Design on freeCodeCamp - Dec 2023** [↗](#)

Developed a strong foundation in website design, progressing from static layouts to responsive website design.

## Skills

---

**Programming**

C#, Java, ASP.NET [↗](#) Core, Entity Framework Core, SQL, HTML & CSS, JavaScript
